
A PRACTICE ROOM FOR ANY INSTRUMENT

THE
WOODSHED

WHERE THE WORK GETS DONE

A rack for the tunes, a logbook for the nights, and a shelf of working paper – manuscript staves, chord boxes, technique ladders, gig sheets. The door is open and the metronome is patient. Come in and do the work.

How To Run The Shed

The Woodshed is the practice room that keeps score – for horn players, string players, drummers, singers, anyone who shows up. Tunes live on a rack, nights live in a logbook, and the shelf keeps honest tools: manuscript staves, chord boxes for the fretted crowd, technique ladders, and a streak board that hates a gap.

HOW A NIGHT IN THE SHED RUNS

1. Rack your tunes – one piece page each, form mapped, trouble spots named.
2. Every night, open the next session log and set one goal. Just one.
3. Climb the metronome ladder – eight boxes, one click at a time.
4. Write down what broke and what clicked while it still stings.
5. Fill the day's dot on the streak board. Do not break the chain.

HOUSE RULES

1. Slow is smooth, and smooth is fast.
2. Loop the two bars that scare you, not the sixteen you love.
3. End every night on something that sounds good.

YOUR OWN RULES

The Worked Example

One tune taken through the mill – Autumn Leaves on the stand with its form mapped and its trouble spots named, and one honest session log beside it, metronome ladder filled rung by rung.

Everything on this stand is marked EXAMPLE. Your working room is Your Studio.

THE STUDIO

HOW THE ROOM IS WIRED

The rack chips land on the same piece pages this hub reaches – every tune is one tap from anywhere. Session logs chain into each other night after night, every piece page jumps to the logbook, and the black bill at the foot of every page walks back home.

KEY

G minor (concert)

TEMPO

Medium swing · 120 BPM

SECTION MAP

LETTER · BARS · WHAT HAPPENS

A	1–8	The falling cycle – four chords down, then home to G minor
A	9–16	Same eight again – resist playing it louder the second time
B	17–24	Minor turnaround first, then the cycle answers in major
C	25–32	The long descent – two-bar steps all the way to the final cadence

TROUBLE SPOTS

BARS	WHAT BREAKS	THE FIX
25-28	The descent rushes once it starts moving	Clap the rhythm first, then half tempo with the click
5-6	The turn into the major chord lands late	Loop just these two bars and lead with the bass note
17-20	B section entry starts flat-footed	Sing the pickup out loud before playing it

PRACTICE TALLY

ONE BOX PER RUN-THROUGH

EARS, FINGERINGS & BREATH MARKS

Breathe (or lift) at the end of every eight. The melody sits on the falling line – let the long notes ring and the form carries itself.

WHAT BROKE

Bars 25-28 still rush above 108 – the descent loses the click on beat 3.
The turn in bar 6 is late every time I start cold.

WHAT CLICKED

Half-tempo runs fixed the descent by the fourth pass.
Singing the B-section pickup first made the entry land on time.

NEXT TIME, FIRST THING

Start at 100 on the C section before touching the top of the tune.

Your Studio

The rack holds your repertoire, the logbook holds your nights, and the shelf holds the working paper – manuscript staves, chord boxes, technique ladders, gig sheets, and the streak board that keeps you coming back.

This copy: 12 piece pages · 24 session logs. Set pieceCount (6-18) and sessionCount (12-48) in the generator config.
